

# Important reminders

Plan your  
tomorrow in the  
app by 11 a.m.

- Only add sessions if you plan to attend
- Rooms will be assigned the evening prior
- Win cool prizes!

Make room

- Avoid leaving empty seats
- Please move to the middle

Share your  
feedback

- Complete each session's in-app survey

CERNER HEALTH CONFERENCE 2018

# SMARTER CARE

# TOMORROW TODAY

## Cerner Health Conference

### Tuesday, Oct. 10

Keynote session 8:15-9:15 a.m.  
*code Learning Lab* 10 a.m. – 5 p.m.

### Wednesday, Oct. 11

Keynote session 8:15-9:15 a.m.  
*code Learning Lab* 10 a.m. – 5 p.m.  
The Bash - CHC's premier networking event  
6:30-10:30 p.m.

### Thursday, Nov. 17

*Cerner Health Conference*  
CHC 2017 ends 1 p.m.

# WELCOME to *code Learning Lab* 2018!

Oct 9-10 | Kansas City, Missouri  
Cerner Health Conference

## What's new this year?

- ✓ **Learn from industry experts**
- ✓ **More flexibility with your schedule** from an expanded format featuring 16 education sessions or open labs
  - 14 session** - lectures and labs
  - Breadth of topics**
    - Basic and advanced
    - SMART on FHIR, HealthIntent APIs, HealtheLife and code
  - Open Labs** with hands-on exercises for new skills or bring your own project
- ✓ **Get the full CHC experience!** Your package includes access to all the activities at CHC in addition to valuable education and training at *code Learning Lab*

## Cerner Health Conference 2018 *code* Learning Lab agenda

Tuesday, Oct. 9		
10 a.m.	<i>code</i> Learning Lab kick-off	Max Reinig
10:30-11:30 a.m.	<i>code</i> Learning Lab Keynote: Interoperability, Apps and Beyond	Micky Tripathi
11:30 a.m.-1 p.m.	Break	
1-2:50 p.m.	Core concepts and best practices to make effective use of FHIR	Max Philips
	Trouble shooting with Cerner Ignite APIs for Millennium	Jennifer Hong
	Introduction to HealtheIntent APIs	Bonnie Bates and Patrick Elam
2:50-3:10 p.m.	Break	
3:10-5 p.m.	Building and integrating SMART on FHIR Applications	Kol Kheang
	Writing data with FHIR	Bradley Strecker
	Configuring the consumer portal	Mike Hemesath and Nick Smith
	Building personnel and organizations	Jessi Sullivan and Justin Knysz
	Open Lab	Cerner engineers and architects

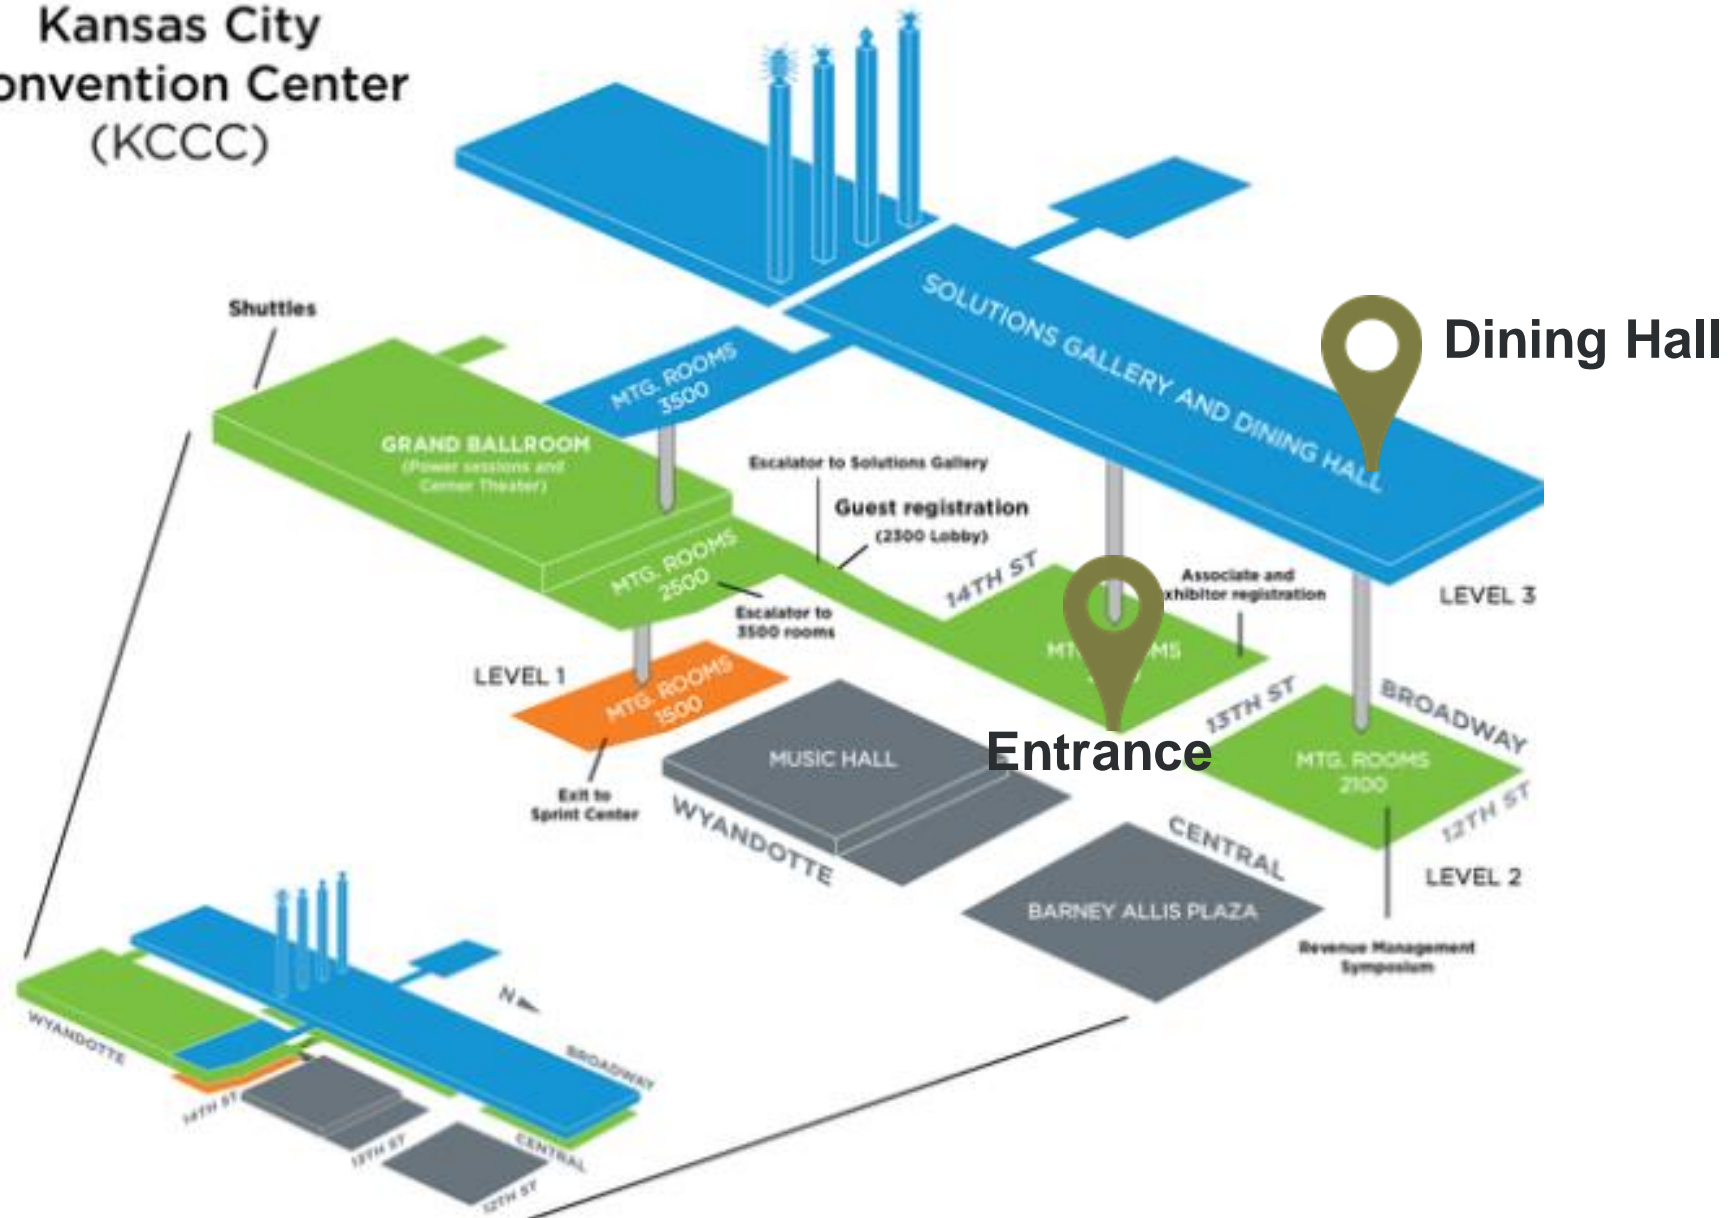

## Cerner Health Conference 2018 code Learning Lab agenda

Wednesday, Oct. 10		
10 a.m.	code App Challenge Winner and Q&A	Yegor Hanov
10:30-11:30 p.m.	code Learning Lab Keynote: Open APIs and a platform approach at Oxford: Supporting developer innovation at a global scale	Nick de Pennington, MD, FRCS, and Glenn Wells PhD
11:30 a.m.-1 p.m.	Break	
1-2:50 p.m.	Calling secured FHIR services using SMART	Matt Randall
	Remote Decision Support with CDS Hooks	Drew Torres
	Collaboration through Cerner Open Developer Experience	Matt Obenhaus and Adam White
	Building a pagelet for the consumer portal	Mike Hemesath and Nick Smith
	Open Lab	Cerner engineers and architects
2:50-3:10 p.m.	Break	
3:40-5:30 p.m.	Patient-oriented APIs and using HealtheIntent data syndication for bulk extraction and delivery	Michelle Miller, Daniel Holder, Matt McKenna, and Jacob Williams
	Putting it all together	Yegor Hanov
	Open Lab	Cerner engineers and architects

# Muehlbach Tower – Main Level

Kansas City  
Convention Center  
(KCCC)

**Max Reinig**  
**Senior Vice President, IP Development**  
**Cerner**

# Welcome to *code* Learning Lab

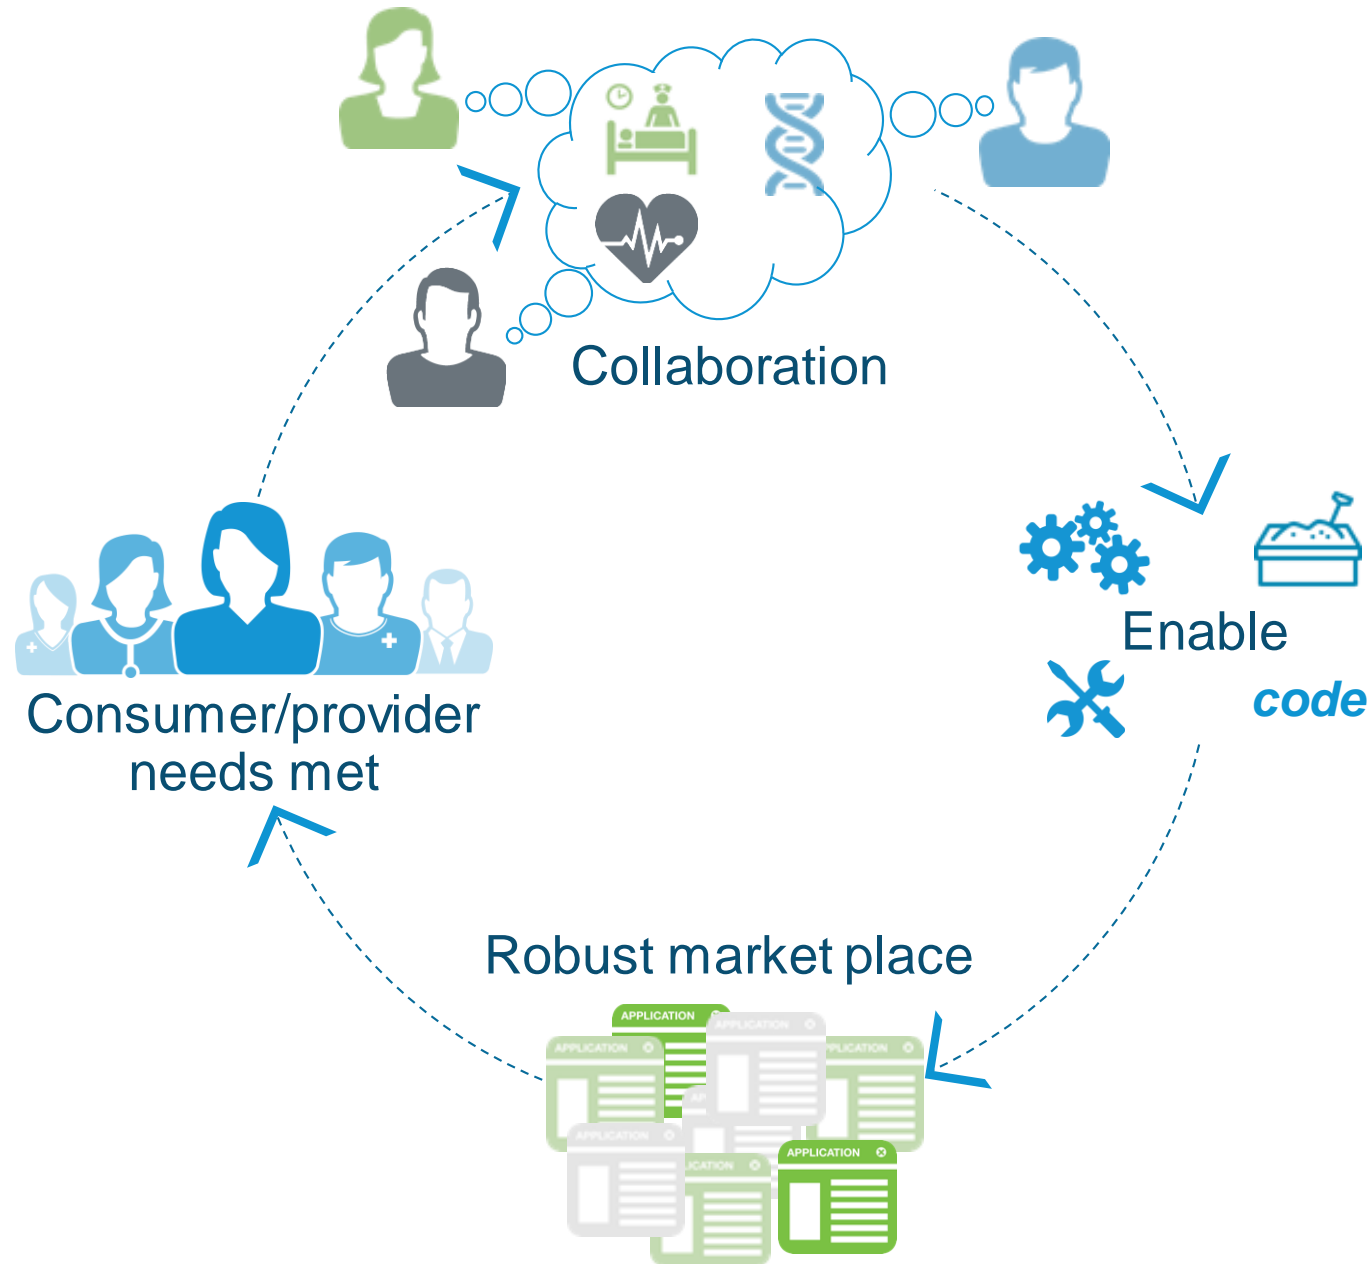

## CHC 2018

Oct. 9, 2018

*Max Reinig, Senior VP of IP Development, Cerner*

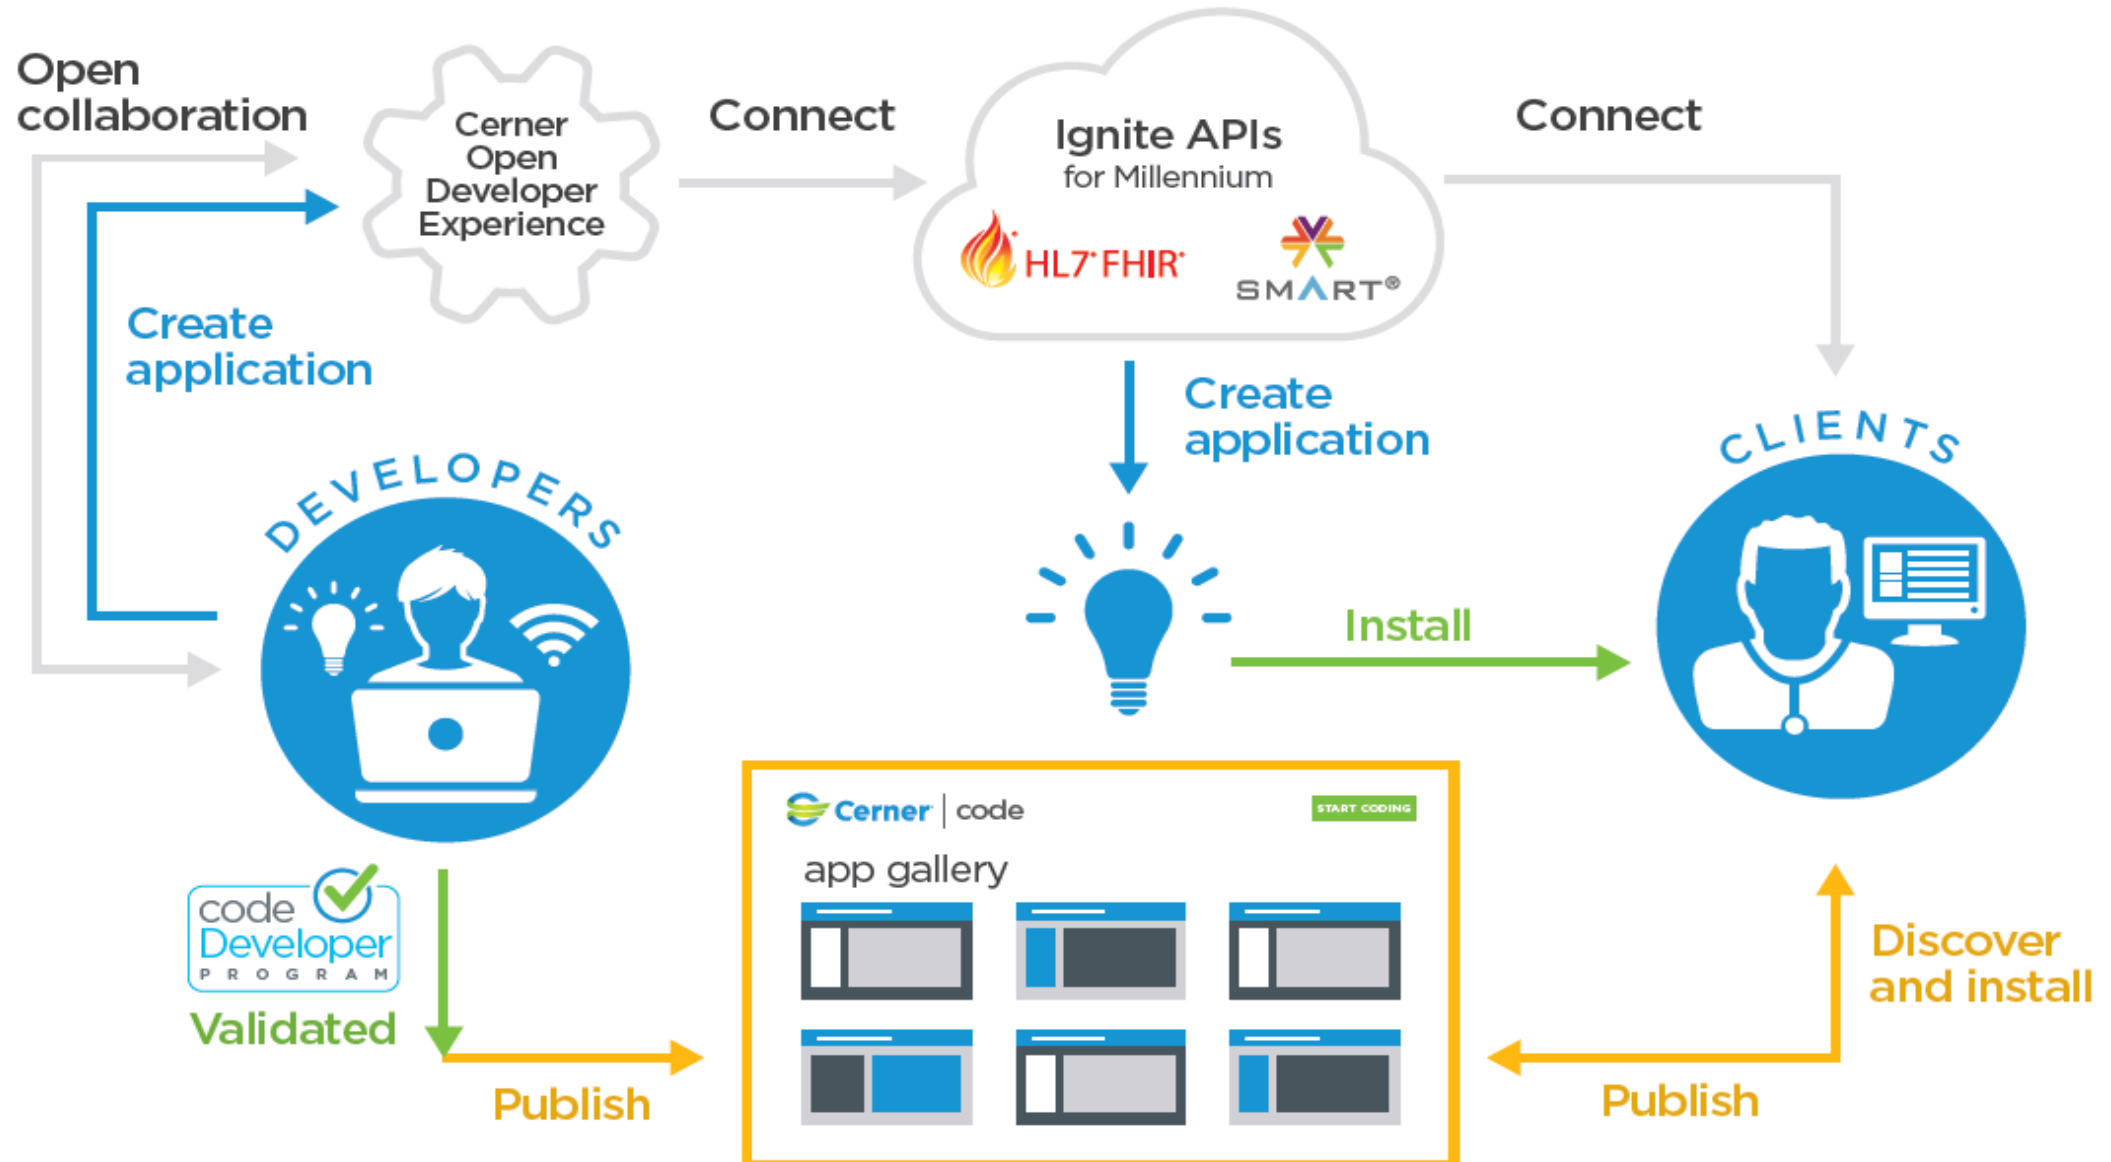

# Enabling innovation – wherever it comes from

Ignite change.

# Developer ecosystem

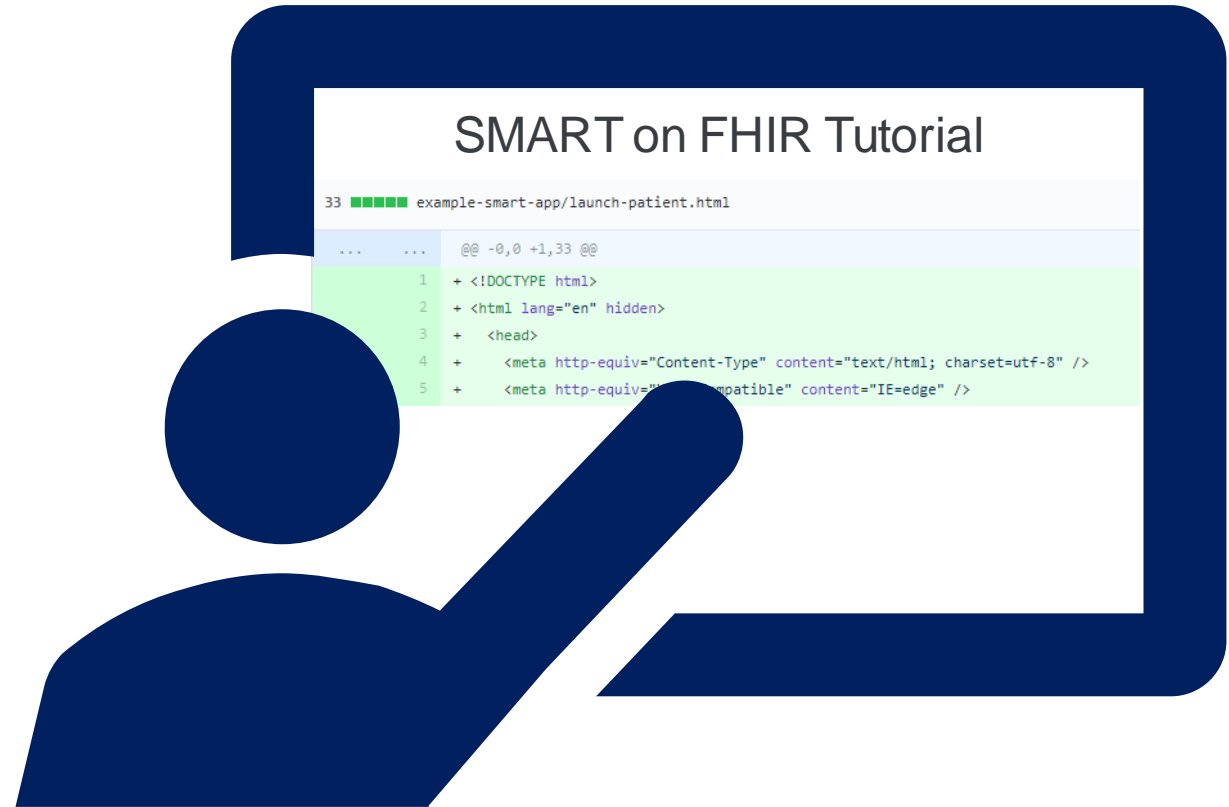

# Argonauts

- Deliverables
  - Standard set of “core” FHIR resources and profiles
  - Ensure broad industry support (vendors, providers, and innovators)
- Argonaut App use-cases
  - **Provider apps – EHR workflow**
  - **Patient apps – portal + phones**
- Authentication and Authorization
  - OAuth2 profile for healthcare

# Driving adoption of standards

- Hands-on tutorial
- Developers learn to create a SMART on FHIR App
- Runs against code console and FHIR Sandbox
- 700+ developers have completed

# Contributions to open source JavaScript library

## Update FHIR.js

EHR Med Order

**Rx** Toprol XL  
50 mg daily

1  
EHR triggers a **CDS hook** and  
invokes a remote service

2  
**CDS Service** executes  
its own rules, leveraging  
FHIR data as needed

3  
Returns **CDS cards**  
(rendered and displayed by EHR)

CDS HOOKS

**information card**

\$200 per month  
(patient pays \$30)

**suggestion card**

Try HCTZ as first-line  
**Switch to HCTZ**

**smart app link card**

Managing hypertension?  
 [Launch JNC 8 Rx Pro](#)

# Examples of current “hooks” (invoked by the EHR)

---

## **patient-view**

Triggered when a patient’s chart is opened

## **medication-prescribe**

Triggered when a medication is selected for prescription

## **order-review**

Triggered when viewing pending orders for signing

# Examples of Cards (returned from CDS Service to EHR)

## Information Card

Textual information for the provider

### Information card

This card displays an informational message to providers

Source: *Demo CDS Service*

## Suggestion Card

Proposed actions encoded as FHIR resources

### Suggestion card

9 out 10 doctors prescribe Tylenol instead

 [Switch to Tylenol](#)

Source: *Demo CDS Service*

## App Link Card

Proposed SMART app that should be used

### App Link Card

This card links to one or more SMART apps

Source: *Demo CDS Service*

# Bunsen: FHIR and Big Data

- Open-sourced our Bunsen library
- Simplifies analyzing FHIR data with Apache Spark
- Encodes FHIR resources directly into Apache Spark's native data structures
- Leverage well-defined FHIR data models directly with Spark SQL

```
1 spark.sql("""
2 select subject.reference person_id,
3        effectiveDateTime date_time,
4        valueQuantity.value value
5 from observations
6 where in_valueset(code, 'heart_rate')
7 """).show()
```

*Simple query against a table of FHIR observation that produces a table of heart rate values.*

person_id	date_time	value
Patient/123	2016-12-27	54.0000
Patient/123	2017-04-18	60.0000

*Prints a table like this.*

# Millennium APIs – Current

FHIR Resources	Read	Create	Update	Search	Example
Allergy Intolerance	✓	✓	✓	✓	Penicillin Allergy
Appointment	✓	✓		✓	Office Visit
Binary	✓				CCD / Clinical Document / etc.
Care Plan	✓			✓	Treatment Plan
Condition	✓	✓	✓	✓	Problem
Contract	✓			✓	Consent
Device	✓			✓	Implant History
Diagnostic Report				✓	Results
Document Reference	✓	✓			CCD / Clinical Document
Encounter	✓			✓	Inpatient Visit
Goal	✓			✓	Walk 500 yards
Immunization	✓			✓	Influenza
Medication Administration	✓			✓	Record of Med or Vaccine
Medication Order	✓			✓	Fluticasone Order
Medication Statement	✓	✓	✓	✓	Documented Meds
Observation				✓	Vitals, Smoking Status
Patient	✓			✓	Demographics
Person	✓			✓	Demographics
Practitioner	✓			✓	Provider Info
Procedure	✓			✓	Hip Replacement
Procedure Request	✓			✓	Non-Med Order
Related Person	✓			✓	Demographics
Schedule	✓	✓	✓	✓	Time Period
Slot	✓			✓	Availability

# HealthIntent APIs – Current

- Allergy
- Condition
- Consumer
- Consumer Notifications
- Data Syndication
- Data Source
- Health Concern
- Healthcare Service
- Immunization
- Longitudinal Plan
- Medication
- Network
- Observation
- Ontology
- Organization
- Patient
- Personnel
- Procedure
- Referral Request
- Risk Assessment
- Specialty
- Tenant
- Universal Data Ingestion

## New API Updates

- Scheduling APIs: New patient self schedule
- Document Read: DocumentReference
- HealthIntent APIs
  - Personnel (read/write)
  - Personnel Groups (read/write)
  - Organizations (read/write)
  - Consumers (read/write)
  - Longitudinal Record APIs (read)
  - Provider, Specialty, Healthcare Service, and other Network-related APIs (read/write)
  - New Data Syndication API for bulk acquisition of HealthIntent data sets (read)

## What are we working on?

- Additional API plan – 2019 (subject to change based upon regulatory and client requirements):
  - Non-Med Order reads
  - Encounter Writes
  - Image writes
  - Organization Reads/Writes
  - PDF Writes
  - Practitioner Writes
  - Procedure Writes
  - Diagnostic Reports (PDF) Writes - (i.e. Cardiology, Microbiology, Pathology, Radiology)
  - Discrete labs and vitals writes
  - Assessment Reads/Writes
  - CDSHooks
  - Bill Pay APIs
  - HealthIntent - Longitudinal Plan (read/write)
  - HealthIntent - Master Person Management (read/write)
  - HealthIntent - New version of HCC API
